

# FUNCTIONALAB

BEAUTY NUTRITION

## Health Drops: Detox

Phytonutrients for detoxification\*

### DESCRIPTION

A collection of phytonutrients that help support the body's natural detoxification systems.\*

### FUNCTIONS

Life can be busy and unpredictable. This is why **Functionalab** created a category of supplements that can follow you everywhere and be taken quickly, in fact, as quick as squeezing one drop into your favorite beverage.

As science continues to discover new technologies to help increase lifespan, it still cannot ensure long-term health. Free radical attacks may take 20 to 30 years to produce undesired conditions. Some chronic diseases such as cardiovascular disease, diabetes and cancer seem to be related to the long-term effects of free radicals. Antioxidants are considered as our cell's natural defense mechanisms, quenching highly reactive free radicals, and stopping them before they can cause structural damage to cells.

We all know that we need to make good lifestyle choices to optimize our health. Adequate amounts and a proper balance of vitamins and minerals are needed not only for maintaining good health, but also for the dietary management of the body's structure and systems.

Functionalab Health Drops provide in only one drop of 1 ml specific antioxidants, including vitamins and minerals, intelligently combined with plants and roots that deliver special health benefits. This drop can easily be mixed in a glass of water or in your favorite beverage.

**Detox** formula combines the antibacterial properties of magnolia bark with the diuretic effect of Dandelion in proper quantities to support a natural and gentle detoxification process. Since antioxidants are also protecting the body against free radical attacks, **Detox** formula also offers high quality antioxidants to

continuously achieve its goal of optimal health.

### FORMULA (#10303-60)

Each 1 ml serving contains:

Supplement Facts Serving Size 1 ml • Servings Per Container 60 One full dropper (1 ml) has an ORAC value of over 550 antioxidant capacity.
